

# Instructions

Note: Firefox is the recommended browser for this event, and is required for the use of VR. The only exceptions are the Oculus Quest and Oculus Quest 2, which can open hubs in their built-in browsers.

# Audio Issues

Quick Guide

# Advice

For the best audio quality and to prevent feedback it is recommended that you use both headphones and a microphone. A pair of headphones with a built-in microphone works great.

# 1. Reload Hubs

On your browser click the button to reload the website. If this does not work continue to step 2.

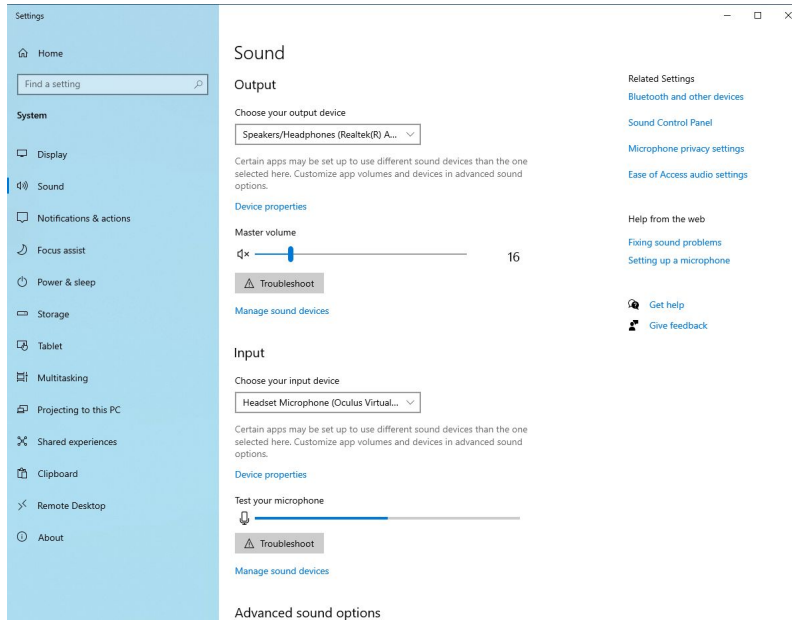

If prompted make sure to allow your browser to access your microphone.

## 2. Unplug & Replug in your headphones and microphone

Make sure your headphones are plugged into the correct port. If you have a separate microphone make sure they too are in the correct port.

# 3. Check Audio Settings

On PC go to Settings > Sound Settings, and choose your Output Device and Input Device.

On Mac go to System Settings > Sound, and choose your Output Device and Input Device.
